New Ind. Area, Umm Al Quwain-UAE 

Master Adhesives Industry LLC is a leading manufacturer based in Umm Al Quwain, specializing in a comprehensive range of high-quality tile adhesives, tile grouts, color plasters, crack fillers, color hardeners, and other cement-based flooring solutions. With a commitment to innovation and excellence, we provide durable, reliable, and performance-driven products designed to meet the diverse needs of the construction and building industry. Our state-of-the-art manufacturing facility and stringent quality control processes ensure that our products consistently deliver superior bonding and finishing results, making us a trusted partner for contractors, builders, and developers across the region.

Platinum Tile Glue MA104

Platinum Tile Glue MA104 is a versatile adhesive for everyday tile installations, offering strong bonding and easy application for ceramic, porcelain, and natural stone tiles on interior and exterior surfaces with high water resistance.

Silver Tile Glue MA103

Silver Tile Glue MA103 is a general-purpose, water resistant tile adhesive formulated with black cement, ideal for various tiling applications. It provides reliable bonding strength for ceramic and porcelain tiles, ensuring durable results on both walls and floors.

Golden Tile Glue MA102

Golden Tile Glue MA102 is a high-quality, water-resistant tile adhesive, perfect for applications in wet areas. It provides strong and durable bonding for ceramic and porcelain tiles, ensuring long-lasting performance on both walls and floors.

Super Tile Glue MA105

Super Tile Glue MA105 is a premium tile adhesive offering exceptional bonding strength and versatility for a wide range of tiling applications. With excellent water resistance and durability, it is ideal for both interior and exterior use, providing reliable performance for ceramic, porcelain, and natural stone tiles.

SuperFlex Tile Glue MA101

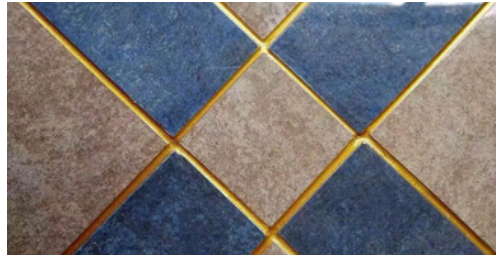

SuperFlex Tile Glue MA101 is a high-performance, flexible tile adhesive designed for demanding applications. Its enhanced flexibility and superior bonding strength make it perfect for areas subject to movement or vibration, ensuring long-lasting adhesion for ceramic, porcelain, and natural stone tiles on both walls and floors.

UltraFlex Tile Glue MA100

It is a top-tier, high-quality tile adhesive engineered for the most challenging applications. Its exceptional flexibility and bonding strength make it ideal for large-format tiles, heavy-duty areas, and surfaces exposed to high stress, providing unmatched performance and durability.

Master Tile Grout (General Purpose)

It is a versatile grout solution available in a wide range of standard and custom colors. Perfect for filling joints between tiles, it offers smooth application, excellent adhesion, and a durable finish for both interior and exterior tiling projects. Available in 5kg & 10kg

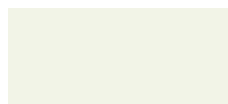

Master Tile Grout Water Proof

It is a durable, water-resistant grout designed for areas exposed to moisture. Available in a variety of standard and custom colors, it provides excellent adhesion and a smooth, long-lasting finish for both interior and exterior tile joints. Available in 5kg & 10kg

Master Proof 301

Master Proof 301 is a single-component hybrid waterproof coating, designed for superior protection against moisture. Available in two versatile colors—grey and white—it provides a durable and flexible barrier, making it ideal for various surfaces in both interior and exterior applications.

Master CoolCoat 402

It is a specialized roof cooling solution designed to reflect heat and reduce surface temperatures. This high-performance coating provides excellent thermal insulation, helping to keep buildings cooler and more energy-efficient. Ideal for a variety of roof surfaces, it enhances comfort while extending the lifespan of roofing materials.

Master Color Hardener for Stamp Concrete

It is a premium product designed to enhance the beauty and durability of stamped concrete surfaces. Available in a range of vibrant colors, this hardener provides a strong, resilient finish while adding aesthetic appeal. It not only increases surface hardness but also helps resist fading, making it ideal for both decorative and functional outdoor applications.

Master Glossy Sealer MA700

Master Glossy Sealer is a premium sealer that provides a high-gloss finish and protects surfaces from stains and moisture. Ideal for concrete, tiles, and other materials, it enhances aesthetic appeal while extending surface lifespan.

Master Matt Sealer MA705

Master Matt Solvent Sealer is a high-quality sealer designed to provide a matte finish while protecting surfaces from stains and moisture. Ideal for concrete, tiles, and other materials, it enhances the natural look of surfaces while ensuring long-lasting durability.

Master Water Based Sealer MA710

Master Water Based Sealer MA710 is an eco-friendly, high-performance sealer specially formulated for natural stones, concrete surfaces & marble top. It protects against moisture and stains while preserving their natural appearance.

Premix Rush Coats

Premix Rush Coat is a ready-to-use coating solution designed for quick application and excellent coverage. Ideal for various surfaces, it provides a durable finish that enhances appearance and protects against wear, making it perfect for both interior and exterior projects.

Bonding Agents

Bonding Agent is a specialized adhesive designed to enhance the adhesion between surfaces, ensuring a strong bond in various applications. Ideal for use with concrete, masonry, and other materials, it improves the performance and durability of construction projects, making it essential for repairs and new installations.

Dry Mix Concrete

Dry Mix Concrete is a pre-mixed formulation designed for easy and convenient use in a variety of construction applications. This versatile product combines high-quality aggregates, cement, and additives, ensuring consistent performance and strength. Just add water to achieve the desired consistency, making it ideal for everything from small repairs to larger construction projects.

Concrete Repair Mortars

These are specially formulated compounds designed for the repair and restoration of damaged concrete surfaces. Offering excellent adhesion, workability, and durability, these mortars are ideal for filling cracks, resurfacing, and patching in both interior and exterior applications. They ensure a strong bond and seamless finish, extending the lifespan of concrete structures.
